**Location:** South Joshua

---

## Summary

Detail-oriented and innovative programmer with over 5 years of experience in software development and a strong background in building high-quality, scalable applications. Proficient in a diverse set of technologies, specializing in **JavaScript** and **FastAPI**. Passionate about leveraging machine learning for data-driven solutions, with a proven track record of delivering successful projects on time and within budget. A collaborative team player with excellent communication skills and a knack for problem-solving.

---

## Experience

### Software Engineer

**Tech Innovations Inc.** – South Joshua, CA

*January 2020 – Present*

- Developed a **Microservices Architecture** that improved system scalability by 30%, allowing deployment of independent services and reducing downtime during updates.
- Led a team of 5 to create a **Data Analytics Dashboard** using **React** and **FastAPI**, resulting in a 25% increase in data retrieval speed for end-users.
- Implemented containerization using **Docker**, streamlining deployment processes and reducing server setup time by 40%.

## Junior Developer

**Creative Solutions LLC** – South Joshua, CA

*June 2018 – December 2019*

- Contributed to the development of a **Mobile App** for clients in the retail sector, enhancing user engagement by 20% through improved UI/UX design.
  - Collaborated on an **API Gateway** project, integrating multiple third-party services and reducing data access latency by 15%.
  - Assisted in the migration of legacy systems to a modern **MySQL** database, improving data integrity and performance.
- 

## Skills

- **JavaScript**: Advanced
  - **FastAPI**: Advanced
  - **Docker**: Intermediate
  - **Machine Learning**: Intermediate
  - **MySQL**: Intermediate
  - **MongoDB**: Intermediate
  - **Java**: Intermediate
  - **React**: Intermediate
- 

## Projects

- **Microservices Architecture**: Spearheaded the design and implementation of a microservices-based system, enhancing the modularity and maintainability of applications.
- **Mobile App**: Developed a cross-platform mobile application for a local business, which received a 4.8-star rating on app stores and increased customer interactions.
- **Data Analytics Dashboard**: Created a dashboard that visualizes real-time data, enabling stakeholders to make informed decisions quickly.
- **API Gateway**: Built a robust API Gateway that streamlined communication between various services, improving the overall efficiency of the system.

- **Web Application:** Designed and developed a full-stack web application that supports user authentication and role-based access, enhancing security and user experience.
- 

## Certifications

- **Microsoft Azure Developer**
  - **Google Cloud Professional**
  - **Scrum Master Certification**
- 

## Education

### Bachelor of Science in Computer Science

University of South Joshua – South Joshua, CA

*Graduated: May 2018*

- Focused on software development and machine learning.
  - Completed a capstone project on predictive analytics using Python and machine learning algorithms.
- 

## Personal Interests

- **Open Source Contribution:** Actively contribute to various open-source projects on GitHub, focusing on enhancing functionalities and fixing bugs.
  - **Tech Blogging:** Write articles on programming best practices and cloud technologies, sharing insights with fellow developers.
