---

Dynamic programmer with 4 years of experience in software development. Proficient in strategic planning and team leadership, with demonstrated ability in cross-functional communication and public speaking.

---

## Experience

---

### Software Developer

#### E-commerce Platform

**Industry:** E-commerce | **Size:** Startup

*June 2021 - Present*

- Developed and maintained the backend systems for a high-traffic e-commerce platform using AWS and Redis, improving response times by 30%. - Collaborated with cross-functional teams to implement features that enhanced user engagement and increased sales conversion rates. - Led the integration of payment processing systems, ensuring compliance with financial regulations and security standards.

## Full Stack Engineer

### Real-time Chat System

**Industry:** Communication Technology | **Size:** Enterprise

*January 2020 - May 2021*

- Designed and implemented a scalable real-time chat application, utilizing AWS services to ensure reliability and performance under heavy load. - Worked closely with UX/UI designers to enhance the user experience, resulting in a 25% increase in user retention. - Conducted code reviews and mentored junior developers, fostering a culture of continuous improvement and learning.

## Mobile App Developer

### Payment Processing System

**Industry:** FinTech | **Size:** Startup

*June 2019 - December 2019*

- Developed a mobile application for payment processing, integrating various payment gateways to streamline transactions for users. - Implemented robust security measures to protect user data and transactions, leading to zero security incidents during the launch phase. - Collaborated with product managers to define and prioritize features, ensuring alignment with business objectives.
