Location: East Erikhaven

Summary

Innovative and dedicated software developer with a passion for crafting efficient and scalable applications. With a robust background in full-stack development and a particular emphasis on front-end technologies, I thrive in collaborative environments and am committed to delivering high-quality code. My experience spans across various domains, including real-time systems and data analytics, enabling me to tackle diverse challenges effectively.

Experience

Software Developer

Tech Innovations Inc. — East Erikhaven, NY

June 2020 - Present

- Developed a **Real-time Chat System** using **React** and **Flask**, enhancing user engagement by 40% and reducing latency by 25%.
- Spearheaded the creation of a **Data Analytics Dashboard** that provided actionable insights for the marketing team, resulting in a 30% increase in campaign effectiveness.
- Optimized various backend services in **Python** and **Go**, achieving a 20% improvement in response times.
- Implemented CI/CD pipelines using **Jenkins**, reducing deployment time from hours to minutes.

Junior Software Developer

Future Tech Solutions — East Erikhaven, NY

January 2018 - May 2020

- Contributed to the development of a **Machine Learning Pipeline** that processed and analyzed large datasets, improving prediction accuracy by 15%.
 - Assisted in designing and implementing a **Microservices Architecture** for a scalable ecommerce platform, facilitating independent deployments and enhancing system resilience.
 - Gained hands-on experience with **TypeScript** and **Angular**, improving the user interface of the company's flagship product.
-

Skills

- **Python**: Intermediate
 - **Rust**: Beginner
 - **TypeScript**: Intermediate
 - **Flask**: Intermediate
 - **FastAPI**: Intermediate
 - **Go**: Intermediate
 - **React**: Expert
 - **Angular**: Intermediate
 - **Java**: Advanced
 - **Jenkins**: Intermediate
-

Projects

- **Mobile App**: Developed a cross-platform mobile application that integrates with a social media API, allowing users to share content seamlessly. Achieved a 4.5-star rating on both iOS and Android platforms.
- **Machine Learning Pipeline**: Designed a pipeline utilizing **Python** and various libraries for data preprocessing and model training, which successfully reduced processing time by 50%.

- **Data Analytics Dashboard:** Created an interactive dashboard using **React** and **D3.js** to visualize key business metrics, contributing to data-driven decision-making within the company.
 - **Microservices Architecture:** Led the architecture design for a new service-oriented application, which improved scalability and reduced downtime during peak usage times.
-

Education

Bachelor of Science in Computer Science

East Erikhaven University — East Erikhaven, NY

Graduated: May 2017

- Relevant Coursework: Data Structures, Algorithms, Web Development, Machine Learning
-

Certifications

- **Certified Java Developer** — Oracle
 - **Python for Data Science** — Coursera
 - **React - The Complete Guide** — Udemy
-

Interests

- Open-source contributions, particularly in Python and Java projects.
 - Exploring new programming languages and frameworks, with a current focus on Rust.
 - Engaging in hackathons and coding challenges to enhance problem-solving skills.
