*Score: 748, Expiration: 2027-12-16*
- 

## Experience

---

### Senior Software Engineer

**Company:** Tech Innovations Inc.

**Industry:** FinTech

**Size:** Enterprise

**Duration:** 2019 - Present

- Developed a **Data Analytics Dashboard** to provide insights into user transactions, improving decision-making processes for financial analysts.
- Led the architecture and deployment of a **Payment Processing System** that streamlined transactions, reducing processing time by 30%.

- Collaborated with cross-functional teams to implement a **Microservices Architecture**, enhancing system scalability and maintainability.

## Software Engineer

**Company:** ChatTech Solutions

**Industry:** Communication

**Size:** Startup

**Duration:** 2015 - 2019

- Designed and implemented a **Real-time Chat System** using Node.js and WebSocket, which supported over 10,000 concurrent users.
- Integrated machine learning algorithms to improve user engagement through personalized recommendations and chat interactions.
- Worked in an Agile environment, participating in daily stand-ups and sprint planning to ensure timely project delivery.

## Junior Developer

**Company:** Data Science Labs

**Industry:** Technology

**Size:** Startup

**Duration:** 2010 - 2015

- Assisted in the development of various web applications using Django and PostgreSQL, focusing on back-end development.
  - Gained first-hand experience in machine learning projects, contributing to model training and evaluation processes.
  - Collaborated with senior developers in an Agile setting, enhancing development skills and understanding of software lifecycle.
-
