**Location:** Savageside

**Hourly Rate:** \$136/hr

**Total Experience:** 14 years

---

## Summary

---

Experienced programmer with 14 years in the tech industry, specializing in Java, Redis, and MongoDB. Proven track record in team leadership and mentoring, with strong adaptability in dynamic environments.

---

## Education

---

### PhD in Artificial Intelligence

Technical University of Munich

*Rank: #20, GPA: 3.45*

---

## Skills

---

- **Java:** Advanced (5 years)
  - **Redis:** Expert (7 years)
  - **MongoDB:** Expert (9 years)
- 

## Soft Skills

---

- Team Leadership

- Mentoring
  - Adaptability
- 

## Languages

---

- English (C2)
- 

## Certifications

---

- **Scrum Master Certification**  
Score: 981, Expiration: 2027-07-21
  - **Google Cloud Professional**  
Score: 809, Expiration: 2027-12-18
- 

## Experience

---

### Senior Software Engineer

#### E-commerce Platform

*Industry: E-commerce | Size: Enterprise*

*2018 - Present*

- Led a team of developers to design and implement high-performance applications, utilizing Java and Redis to optimize data retrieval and processing. - Developed scalable web applications, enhancing user experience and increasing customer engagement by 30%. - Mentored junior developers, fostering a collaborative environment and ensuring adherence to best coding practices.

### Software Developer

#### Web Application

*Industry: Technology | Size: Startup*

*2015 - 2018*

- Contributed to the development of a web application that served over 100,000 users, focusing on backend services using MongoDB for efficient data management.

- Collaborated with cross-functional teams to deliver features on time, improving application reliability and performance.
- Participated in agile ceremonies, driving continuous improvement within the development team.

## Junior Developer

### FinTech Solutions

*Industry: Finance | Size: Enterprise*

*2010 - 2015*

- Assisted in the development of financial applications utilizing Java, contributing to the migration of legacy systems to modern platforms.
- Engaged in testing and debugging processes to ensure high-quality code, resulting in a 15% reduction in production errors.
- Supported senior developers in project planning and execution, gaining insights into software development life cycle.
