Experience

Software Engineer

FinTech Startup

Real-time Chat System Development

June 2019 - Present

- Designed and implemented a real-time chat system using Node.js and Vue.js, improving customer support response time by 40%.
- Collaborated with cross-functional teams to create an API Gateway that streamlined communication between microservices.
- Mentored junior developers, fostering a culture of continuous learning and innovation.

Full Stack Developer

E-commerce Enterprise

Payment Processing System Enhancement

January 2017 - May 2019

- Developed and optimized a payment processing system using Spring Boot and Angular, increasing transaction speed by 25%.
- Integrated various payment gateways, ensuring compliance with industry standards and enhancing user trust.
- Led a team of developers to implement CI/CD pipelines using Terraform and Azure, reducing deployment times significantly.

Junior Developer

Tech Consulting Startup

API Gateway Implementation

July 2015 - December 2016

- Assisted in the development of an API Gateway to support multiple client applications, improving API response times.
- Participated in code reviews and contributed to the development of best practices for software design and architecture.

- Improved existing applications by implementing new features and fixing bugs in a timely manner.
-
