---

## Summary

Detail-oriented and passionate programmer with over 5 years of experience in full-stack development, specializing in data science and cloud solutions. Proven track record of delivering high-quality applications and data-driven insights. Adept at working in agile environments and collaborating with cross-functional teams to drive projects to successful completion.

---

## Experience

### Software Developer

**Tech Innovations Inc.** – Remote

*January 2020 – Present*

- Developed a **Data Analytics Dashboard** that improved data visualization and reporting capabilities, resulting in a 30% reduction in report generation time.
- Spearheaded the creation of an **E-commerce Platform** using Angular and Django, enhancing user experience which led to a 25% increase in sales within the first quarter post-launch.
- Collaborated with a team to implement CI/CD pipelines using **Jenkins** and **Docker**, which reduced deployment times by 40%.
- Utilized **Kubernetes** to orchestrate containerized applications, improving scalability and resource efficiency.

## Junior Developer

**NextGen Solutions** – Edwardsfort

*June 2018 – December 2019*

- Contributed to the development of a **Web Application** that streamlined client interactions, which resulted in a 15% increase in client satisfaction scores.
  - Assisted in building a **Machine Learning Pipeline** for predictive analytics, utilizing **Python** and **Data Science** methodologies, achieving an accuracy improvement of 20% over previous models.
  - Engaged in code reviews and implemented best practices in **Git** to maintain high code quality.
- 

## Skills

- **Data Science**: Expert
  - **Django**: Advanced
  - **JavaScript**: Advanced
  - **TypeScript**: Intermediate
  - **Angular**: Intermediate
  - **Vue.js**: Intermediate
  - **Jenkins**: Intermediate
  - **Git**: Intermediate
  - **Kubernetes**: Advanced
  - **Redis**: Intermediate
- 

## Projects

- **Data Analytics Dashboard**: Designed and implemented a dashboard for real-time data analysis, integrating various data sources and providing actionable insights for stakeholders.
- **E-commerce Platform**: Led the development of a responsive e-commerce site, incorporating user authentication and payment gateways, which resulted in a seamless shopping experience.

- **Web Application:** Developed a client management system that automated scheduling and communication, significantly reducing administrative overhead.
  - **Machine Learning Pipeline:** Built a pipeline for data preprocessing and model training, which provided insights that directly influenced business strategy.
- 

## Certifications

- **Microsoft Azure Developer**
  - **Docker Certified Associate**
  - **AWS Certified Solutions Architect**
- 

## Education

**Bachelor of Science in Computer Science**

**University of Edwardsfort – Edwardsfort**

*Graduated: May 2018*

- Focused on software development and data analysis, working on various projects that utilized modern programming languages and frameworks.
