

Brianna Stewart

Email: michaelwilliams@example.org

Location: South Natashaton

Summary

Detail-oriented and innovative software developer with over 5 years of experience in building scalable web applications. Proficient in modern technologies, specializing in Node.js and JavaScript, with a strong background in cloud services like AWS. Passionate about leveraging technical skills to develop robust solutions and enhance user experience. Highly collaborative, with a proven track record in agile environments.

Experience

Senior Software Developer

Tech Innovations Ltd. – South Natashaton, NY

March 2021 – Present

- Lead the development of a **Real-time Chat System** that supports over 10,000 concurrent users, improving user engagement by 40%.
- Engineered a **Payment Processing System** that streamlined transactions, reducing payment failures by 25% through robust error handling and logging.
- Collaborated with cross-functional teams to design and implement a **Content Management System**, enhancing content delivery speed by 30%.

Software Developer

Creative Solutions Inc. – South Natashaton, NY

June 2018 – February 2021

- Developed an **E-commerce Platform** that increased sales by 50% in the first

quarter post-launch through optimized user experience and integrated payment solutions. - Implemented a **Machine Learning Pipeline** for predictive analytics, resulting in a 20% increase in conversion rates by leveraging user behavior insights. - Contributed to maintaining and improving an existing codebase using **Git**, ensuring code quality and facilitating seamless team collaboration.

Skills

- **Node.js:** Expert
 - **JavaScript:** Advanced
 - **React:** Intermediate
 - **AWS:** Intermediate
 - **Git:** Intermediate
-

Projects

- **Machine Learning Pipeline**
Developed a scalable solution for processing and analyzing large datasets, enabling predictive modeling for business insights.
 - **Content Management System**
Created a user-friendly platform for content creators, allowing for easy updates and management of digital assets.
 - **Payment Processing System**
Built an integrated solution utilizing secure APIs for handling transactions efficiently, reducing processing time by 15%.
 - **E-commerce Platform**
Designed and developed a full-stack e-commerce site, implementing features like user authentication, product management, and customer feedback systems.
 - **Real-time Chat System**
Engineered a real-time messaging application leveraging WebSocket technology, enhancing user interaction and satisfaction.
-

Education

Bachelor of Science in Computer Science

South Natashaton University – South Natashaton, NY

Graduated: May 2018

- Relevant coursework: Data Structures, Web Development, Machine Learning

Certifications

- **Google Cloud Professional**

Achieved certification in 2022, showcasing expertise in cloud architecture and solution design.

Additional Information

- Actively contribute to open-source projects on GitHub, focusing on enhancing community-driven tools and libraries.
 - Enthusiastic about continuous learning; currently exploring advanced cloud computing solutions and DevOps practices.
