-

Summary

A dedicated programmer with **7 years** of experience in software development and a strong command of C++ and Data Science. Proficient in Agile methodologies, team leadership, and mentoring. Excellent public speaking skills and a commitment to fostering collaborative environments.

Experience

Software Engineer

FinTech Startup

Payment Processing System

2019 - Present

- Developed and maintained a robust payment processing system, enhancing transaction speed by 30% using C++.
- Collaborated with cross-functional teams to implement Agile practices, improving team productivity and project delivery timelines.

- Mentored junior developers, providing guidance in coding best practices and software design principles.

Data Scientist

Enterprise Content Management

Content Management System

2016 - 2019

- Analyzed large datasets to drive insights for content management solutions, utilizing advanced data science techniques with a focus on predictive analytics.
- Integrated Redis for real-time data processing, improving data retrieval speeds by 50%.
- Led workshops on data-driven decision-making, enhancing team understanding of data science applications.

Junior Developer

E-commerce Startup

2015 - 2016

- Assisted in the development of e-commerce functionalities using C++ and AWS, facilitating a seamless user experience.
- Supported the migration of legacy systems to cloud infrastructure, contributing to a 40% reduction in operational costs.
- Engaged in scrum meetings, actively participating in sprint planning and retrospectives.
