Summary

Dynamic and passionate programmer with over 5 years of experience in software development and data science. Possessing a strong foundation in various technologies, I thrive in fast-paced environments where I can leverage my skills in both frontend and backend development. Known for my collaborative approach and problem-solving capabilities, I am eager to contribute to innovative projects that drive business success.

Skills

- **C++:** Intermediate - Developed multiple algorithms for data processing tasks, optimizing execution time by 30%.
 - **Docker:** Intermediate - Implemented containerization solutions for microservices, improving deployment speed by 50%.
 - **Django:** Intermediate - Created RESTful APIs for a content management system, enhancing data retrieval efficiency.
 - **Redis:** Intermediate - Utilized Redis for caching, reducing database load and improving application performance.
 - **Vue.js:** Advanced - Led the frontend development of a customer-facing application, achieving a 40% increase in user engagement.
 - **Data Science:** Intermediate - Analyzed large datasets to extract insights, contributing to strategic decision-making processes.
 - **Java:** Intermediate - Developed backend services for a large-scale enterprise application, ensuring seamless integration with existing systems.
-

Experience

Software Developer

Tech Innovators Inc. – Meghanberg

March 2021 – Present

- Spearheaded the development of an **API Gateway** that improved system integration and reduced latency by 25%.
- Collaborated in a team to design a **Microservices Architecture** that increased application scalability and maintainability.
- Enhanced a **Content Management System** by implementing new features based on user feedback, resulting in a 15% increase in user satisfaction scores.

Junior Developer

Creative Solutions Ltd. – Meghanberg

January 2018 – February 2021

- Contributed to a variety of projects, focusing on backend development using **Django** and **Java**, ensuring high-quality code and adherence to best practices.
- Assisted in deploying applications using **Docker**, streamlining the CI/CD process and reducing deployment times.
- Participated in agile ceremonies and contributed to the Scrum process, ensuring alignment with project goals.

Projects

API Gateway

- Developed an API Gateway that serves as a single entry point for multiple microservices, enhancing security and performance.

Microservices Architecture

- Designed and implemented a microservices architecture for a large-scale application, resulting in improved resilience and easier scaling.

Content Management System

- Built a robust content management system using Django, allowing non-technical users to manage content with ease, leading to a 20% reduction in support queries.
-

Certifications

- **Docker Certified Associate** - [Certification ID: 123456789]
 - **Google Cloud Professional** - [Certification ID: 987654321]
 - **Scrum Master Certification** - [Certification ID: SM-2023-456789]
-

Education

Bachelor of Science in Computer Science

University of Meghanberg

Graduated: May 2017

- Relevant Coursework: Data Structures, Software Engineering, Database Management Systems
 - Projects: Developed a capstone project on data visualization using Python and JavaScript, which was showcased at the university's tech fair.
