Email: glopez@example.org

Location: New Anthony

Summary

Dynamic and results-driven programmer with over 5 years of experience in software development, specializing in microservices architecture and web applications. Proven track record of delivering high-quality solutions on time and within budget. Strong expertise in **Django** and **AWS**, with a passion for utilizing cutting-edge technologies to solve complex problems. Committed to continuous learning, currently expanding knowledge in **Machine Learning**.

Experience

Senior Software Engineer

Tech Innovations Inc. - New Anthony, NY

June 2020 - Present

- Led the development of a **mobile app** that increased user engagement by 30% within the first three months of launch.
- Designed and implemented an **API Gateway** that improved system performance by reducing response times by 40% through efficient microservices integration.
- Collaborated with cross-functional teams to optimize application features, resulting in a 25% reduction in customer complaints.
- Mentored junior developers in best practices and code optimization, fostering an environment of continuous improvement.

Software Developer

NextGen Solutions - New Anthony, NY

January 2018 - May 2020

- Developed and maintained web applications using **Django** (Expert) and **Flask** (Intermediate), enhancing functionality and user experience.
 - Integrated **PostgreSQL** (Intermediate) databases to streamline data management, achieving a 20% improvement in query performance.
 - Implemented **Docker** (Intermediate) for containerization, which simplified deployment processes and reduced downtime by 15%.
 - Participated in Agile development processes, contributing to bi-weekly sprints that increased project delivery speed.
-

Skills

- **Microservices:** Expert
 - **Django:** Expert
 - **AWS:** Expert
 - **JavaScript:** Intermediate
 - **Flask:** Intermediate
 - **Docker:** Intermediate
 - **PostgreSQL:** Intermediate
 - **Machine Learning:** Beginner
-

Projects

- **Mobile App:** Developed a cross-platform mobile application that allows users to track their fitness goals. Utilized **Django** for the backend and React Native for the frontend, achieving over 10,000 downloads in the first month.
 - **API Gateway:** Created a robust API gateway for a microservices architecture that improved system scalability and security. Conducted performance tests and optimization, resulting in a 50% increase in API throughput.
-

Education

Bachelor of Science in Computer Science

University of New Anthony - New Anthony, NY

Graduated: May 2017

- Relevant Coursework: Data Structures, Algorithms, Web Development, Machine Learning.
-

Certifications

- **AWS Certified Solutions Architect - Associate** (2021)
 - **Django for Everybody Specialization** - Coursera (2020)
-

Interests

- Exploring advancements in **Machine Learning** and how they can be integrated into web applications.
 - Contributing to open-source projects that focus on sustainability and community development.
 - Participating in hackathons to collaborate with other developers and learn new technologies.
-
