## Summary

Detail-oriented and innovative programmer with over 5 years of experience in software development. Proficient in a variety of programming languages and technologies, with a strong focus on building scalable web applications and data-driven solutions. Passionate about leveraging technology to solve complex problems and improve user experiences. Seeking to contribute expertise in Rust, Python, and advanced data science techniques to a dynamic tech team.

---

## Experience

### Software Engineer

**Tech Innovators Inc., Wallacemouth**

*June 2020 – Present*

- Developed and maintained a **real-time chat system** that improved user engagement by 40%, utilizing **Angular** for the frontend and **Python** for backend services.
- Led a team of 4 in creating an **API Gateway** that streamlined services across microservices architecture, resulting in a 30% reduction in response time and improved system reliability.
- Integrated machine learning algorithms into existing applications, enhancing predictive capabilities for user behavior analysis.

### Junior Developer

**BrightFuture Solutions, Wallacemouth**

*January 2018 – May 2020*

- Contributed to the development of an **e-commerce platform** with a focus on user interface design and database management using **MySQL**, achieving a 25%

increase in sales within the first quarter post-launch. - Assisted in the creation of a **Content Management System**, enabling clients to manage their content effortlessly and improving customer satisfaction ratings by 15%. - Collaborated with cross-functional teams to optimize application performance, leading to a 20% reduction in load times.

---

## Skills

- **Rust:** Advanced
  - **Python:** Advanced
  - **MySQL:** Expert
  - **C++:** Advanced
  - **Machine Learning:** Intermediate
  - **Angular:** Advanced
  - **Kubernetes:** Intermediate
  - **Data Science:** Advanced
- 

## Projects

- **Web Application:** Designed and implemented a responsive web application for a local business, driving a 50% increase in online visibility.
  - **Real-time Chat System:** Developed a scalable chat application that supports thousands of concurrent users with low latency, improving customer support efficiency.
  - **E-commerce Platform:** Led a team to develop a full-stack e-commerce solution, integrating payment processing and inventory management features.
  - **API Gateway:** Architected a robust API gateway that facilitated seamless communication between microservices, enhancing system flexibility.
  - **Content Management System:** Built a user-friendly CMS that allows non-technical users to create and manage content effortlessly.
-

## Certifications

- Microsoft Azure Developer
- 

## Education

**Bachelor of Science in Computer Science**

**University of Wallacemouth**

*Graduated: May 2017*

- Relevant Coursework: Algorithms, Data Structures, Web Development, Machine Learning

---

## Personal Projects

- Developed a personal portfolio website showcasing programming projects and skills, utilizing **HTML**, **CSS**, and **JavaScript**.
  - Created a machine learning model to predict housing prices, achieving an accuracy rate of 85% on test data.
-
