## Summary

Dynamic and detail-oriented programmer with over 5 years of experience in software development and data science. Adept at using advanced technologies to develop scalable applications and optimize data-driven solutions. Known for a strong work ethic, excellent problem-solving abilities, and a passion for continuous learning. Seeking to leverage my expertise in programming and data science to contribute to innovative projects.

---

## Experience

### Senior Software Developer

Tech Innovators Inc., Grayburgh

*January 2020 - Present*

- Developed an **E-commerce Platform** that increased sales by 25% within the first six months post-launch, utilizing **Advanced Python** and **MySQL** for backend services.
- Implemented CI/CD pipelines using **Git** and **DevOps** practices, reducing deployment time by 40%.
- Collaborated with cross-functional teams to integrate **Machine Learning** algorithms, enhancing product recommendation systems and improving user experience.
- Led a team of 5 developers in the creation of a **Content Management System** that streamlined content delivery processes, resulting in a 30% increase in content update efficiency.

## Software Engineer

### Data Solutions Co., Grayburgh

June 2017 - December 2019

- Designed and maintained database systems using **MySQL** (Advanced), ensuring data integrity and optimized query performance.
  - Engaged in full software development lifecycle for various projects, including working with **C++** and **Data Science** methodologies to analyze large datasets.
  - Developed and integrated RESTful APIs which enhanced system capabilities and facilitated seamless data exchange between platforms.
  - Contributed to team knowledge-sharing sessions, showcasing best practices in **Kubernetes** and **DevOps** methodologies.
- 

## Skills

- **MySQL:** Advanced
  - **Git:** Advanced
  - **C++:** Advanced
  - **Data Science:** Advanced
  - **Machine Learning:** Intermediate
  - **Python:** Advanced
  - **React:** Beginner
  - **TypeScript:** Intermediate
  - **DevOps:** Advanced
  - **Kubernetes:** Advanced
- 

## Projects

### E-commerce Platform

- **Description:** A robust platform built to facilitate online shopping, featuring user authentication, payment integration, and an intuitive user interface.
- **Technologies Used:** Python, MySQL, Git, DevOps, Machine Learning

- **Achievements:** Achieved a 25% increase in sales within six months of launch; optimized user engagement through tailored product recommendations.

## Content Management System

- **Description:** A user-friendly system designed for content creators to manage and publish digital content efficiently.
  - **Technologies Used:** C++, Advanced Python, Git
  - **Achievements:** Reduced content update time by 30%, enabling faster delivery of information to end-users.
- 

## Education

### Bachelor of Science in Computer Science

**Grayburgh University**

*Graduated: May 2017*

- Relevant Coursework: Data Structures, Algorithms, Database Management, Software Engineering.

---

## Certifications

- Certified in Data Science - **Data Science Council of America (DASCA)**, 2021
  - Kubernetes Administrator - **Cloud Native Computing Foundation**, 2022
  - DevOps Practitioner - **DevOps Institute**, 2023
- 

## Personal Interests

- Exploring advancements in **Machine Learning** and **Data Science**.
  - Contributing to open-source projects on GitHub.
  - Engaging in hackathons and coding competitions to sharpen problem-solving skills.
