 - Score: 819
 - Expiration: 2026-05-23
 - Certified Kubernetes Administrator
 - Score: 834
 - Expiration: 2028-02-13
-

Experience

Software Developer

E-commerce Platform Company

Industry: E-commerce | *Size:* Startup

Duration: 2021 - Present

- Developed and maintained robust e-commerce solutions utilizing Node.js and AWS, enhancing the user experience and increasing transaction efficiency.
 - Collaborated with cross-functional teams to implement a Microservices Architecture, which improved system scalability and maintainability.
 - Led Scrum meetings to ensure timely delivery of project milestones and fostered a culture of continuous improvement within the team.
-

Full Stack Developer

Content Management System Company

Industry: Technology | *Size:* Enterprise

Duration: 2020 - 2021

- Designed and implemented a Content Management System using Python and AWS, enabling clients to manage their digital assets effectively.
 - Integrated real-time chat functionality to improve customer engagement and support, enhancing user satisfaction.
 - Participated in Agile development processes, contributing to sprint planning and retrospectives, which streamlined workflows and increased team productivity.
-

Junior Developer

Real-time Chat System Company

Industry: Communication | *Size:* Startup

Duration: 2019 - 2020

- Assisted in the development of a real-time chat system using Java and Kubernetes, ensuring high availability and performance.

- Gained hands-on experience with cloud services and container orchestration, which contributed to the successful launch of the application.
 - Worked closely with senior developers to troubleshoot and optimize existing codebases, resulting in a 30% reduction in load times.
-
