Experience

Senior Software Engineer

E-commerce Platform

Industry: E-commerce | Size: Enterprise

Duration: 2018 - Present

- Led the development of a scalable e-commerce platform using Node.js and Redis, improving transaction speeds by 30%. - Collaborated with cross-functional teams to design a microservices architecture for the API gateway, enhancing system reliability. - Mentored junior developers in best practices for software development and encouraged a culture of continuous learning.

Software Developer

Content Management System

Industry: Tech | Size: Startup

Duration: 2015 - 2018

- Developed and maintained a content management system using C++ and TypeScript, which supported over 100,000 users. - Implemented new features based on user feedback, resulting in a 25% increase in user engagement. - Participated in Agile ceremonies, contributing to sprint planning and retrospectives to improve team performance.

Full Stack Developer

Mobile App

Industry: Health Tech | Size: Startup

Duration: 2012 - 2015

- Built a mobile application using Go and Vue.js, which helped users track health metrics and connect with healthcare providers. - Integrated PyTorch for predictive analytics, enhancing the app's functionality and user experience. - Worked closely with UX/UI designers to ensure a seamless user interface and experience.
