Experience

Senior Software Engineer

E-commerce Platform | Enterprise
2018 - Present
- Developed and maintained a scalable e-commerce platform using Spring Boot and PostgreSQL, enhancing user experience and increasing customer satisfaction. - Collaborated with cross-functional teams to design a real-time chat system for customer support, resulting in a 30% reduction in response time. - Led a team of developers in adopting Agile methodologies, improving project delivery timelines by 25%.

Full Stack Developer

Mobile App | Startup

2015 - 2018

- Designed and implemented a mobile application using React and Node.js, achieving over 50,000 downloads in the first year. - Integrated third-party APIs to enhance app functionality, resulting in a more engaging user experience. - Conducted code reviews and mentored junior developers, fostering a collaborative team environment.

Software Developer

Web Application | Startup

2010 - 2015

- Contributed to the development of a web application for a FinTech startup, utilizing Java and Spring Boot. - Implemented database solutions with PostgreSQL, ensuring data integrity and performance optimization. - Participated in daily Scrum meetings and contributed to sprint planning, enhancing team productivity and project visibility.
