Location: Paulstad

Hourly Rate: $92/hr

Total Experience: 9 years

Education

PhD in Artificial Intelligence

Georgia Institute of Technology

Rank: #15, GPA: 3.53

Summary

Experienced programmer with 9 years in software development, specializing in building scalable applications and microservices. Proficient in conflict resolution, mentoring junior developers, and adapting to new technologies quickly.

Skills

- **C++**: Advanced (5 yrs)
- **Django**: Expert (8 yrs)
- **Node.js**: Intermediate (2 yrs)
- **React**: Beginner (1 yr)
- **Jenkins**: Expert (7 yrs)
- **Docker**: Intermediate (3 yrs)
- **Terraform**: Expert (7 yrs)

Soft Skills

- Conflict Resolution
- Mentoring
- Adaptability

Languages

- **English**: C2
- **German**: B2
- **French**: B2

Certifications

- **Certified Kubernetes Administrator**
  Score: 889
  Expiration: 2026-10-07

- **Docker Certified Associate**
  Score: 787
  Expiration: 2027-09-05

- **Microsoft Azure Developer**
  Score: 993
  Expiration: 2028-02-24

Experience

Software Engineer

Tech Innovations (FinTech)
Enterprise
2018 - Present
- Developed a **Microservices Architecture** that improved system scalability and

reduced deployment times by 30%. - Implemented an **API Gateway** for secure and efficient communication between services, enhancing overall system performance. - Led a team in creating a **Machine Learning Pipeline** that automated data processing, resulting in a 25% increase in data accuracy.

Full Stack Developer

Mobile Solutions Inc. (Tech Startup)
Startup
2015 - 2018
- Designed and developed a **Mobile App** utilizing **Django** and **React**, leading to a 40% increase in user engagement. - Collaborated on implementing **Jenkins** for CI/CD, streamlining the development process and reducing time-to-market for new features. - Worked on containerization using **Docker**, which improved the deployment process and environment consistency.

DevOps Engineer

Global Enterprises (E-commerce)
Enterprise
2013 - 2015
- Managed infrastructure as code using **Terraform**, enabling rapid provisioning of resources and reducing overhead costs. - Developed CI/CD pipelines using **Jenkins** to automate testing and deployment processes, resulting in a significant reduction in manual errors. - Contributed to the migration of legacy systems to a microservices-based architecture, enhancing system resilience and scalability.
