Location: Danielchester

Hourly Rate: $114/hr

Total Experience: 11 years

Summary

Results-driven programmer with **11 years of experience** in software development and data analytics. Skilled in **adaptability**, **public speaking**, **problem solving**, and **conflict resolution**. Proven track record in delivering high-quality solutions in various domains including Artificial Intelligence and cloud computing.

Education

PhD in Artificial Intelligence

Stanford University

Rank: #2

GPA: 3.96

Skills

- **Redis**: Advanced (6 years)
- **Data Science**: Expert (8 years)
- **AWS**: Expert (11 years)
- **Azure**: Expert (11 years)
- **Kubernetes**: Expert (8 years)

Soft Skills

- Adaptability
- Public Speaking
- Problem Solving
- Conflict Resolution

Languages

- English (C1)
- Polish (C2)

Experience

Senior Data Engineer

FinTech Company (Enterprise)
2018 - Present
- Developed a **Machine Learning Pipeline** to optimize financial predictions, improving accuracy by 20%. - Designed and implemented a **Data Analytics Dashboard** that provides real-time insights for stakeholders, increasing data-driven decision-making. - Collaborated with cross-functional teams to integrate cloud services (AWS and Azure) for enhanced data processing capabilities.

Software Developer

Healthcare Startup (Startup)
2015 - 2018
- Led the development of a **Mobile App** that facilitates patient-doctor communication, resulting in a 30% increase in user engagement. - Contributed to a **Web Application** for managing patient records, ensuring compliance with healthcare regulations. - Engaged in Agile methodologies to streamline project execution and improve team collaboration.

Cloud Solutions Architect

E-Commerce Enterprise (Enterprise)

2012 - 2015

- Architected a **Real-time Chat System** for customer service, significantly reducing response time and enhancing user experience. - Implemented container orchestration using **Kubernetes** to deploy and manage microservices, leading to improved system reliability. - Optimized cloud infrastructure on AWS, resulting in a 25% reduction in operational costs.
